

Company:

Verifysoft Technology GmbH is an independent limited company, which has been founded in 2003 by five private investors and software testing specialists.

Verifysoft Technology develops and markets tools for software testing and analysis.

In addition to our own software we propose and support testing technologies of our partners.

Verifysoft Technology has long term agreements with the two companies Testwell and Conformiq (Finland) for their tools distribution in France and some other European countries. Since 2006, we are also partner of Coverity Inc. (San Francisco) for the distribution of their static analysis tools in German speaking countries.

Verifysoft Technology proposes technical support for all these tools. If necessary we can also set up adaptations to our customers needs. Some of the tools has been developed in cooperation by Verifysoft Technology and our partners.

The company is based in Offenburg Technology Park, in south-west Germany, close to the French border):

Verifysoft Technology GmbH
Technologiepark – Industriegebiet West 4

Partners:

Testwell Oy, Tampere (Finland), www.testwell.fi

Testwell was founded in 1992 with a mission to further develop, market and support the tools which has been developed before by Nokia Data Systems Oy. Testwell has produced many major upgrade versions on these tools. Testwell is today among the technical leaders in the tool market.

Testwell is located in the "Technology Center Hermina" in Tampere (about 200 kilometers north of Helsinki). Testwell works in close cooperation with the Tampere University of Technology.

The first "Testwell" tools have already been developed in 1984.

Verifysoft Technology supports and markets all testing tools of Testwell in western and central European markets:

CTC++ Test Coverage Analyzer for C and C++

CMT++/CMTJava Code Complexity Measures Tools for C/C++ and Java

CTA++ C++ Test Aider

Conformiq, Espoo/Helsinki (Finland), www.conformiq.com

Conformiq Ltd. is an expert in software testing and quality assurance. The company is based in Espoo, close to Helsinki (Finland). The origins of Conformiq Software are in the scientific research programs and pioneering projects of leading Finnish technology companies (i.e. Nokia and Kone).

The company was founded in 1998. Main products of Conformiq are Conformiq Test Generator and Qtronic, both automatic test generators for model-based testing.

Coverity Inc., San Francisco (U.S.A), www.coverity.com

Coverity was founded in 2002 in San Francisco by scientists from the Stanford University. Verifysoft supports and markets the tools Coverity Prevent™ and Coverity Extend™ in German speaking countries. Coverity Prevent™ is the leading tool for static analysis. Coverity Extend™ is a tool which enable developpers to define and check codage rules. Thus it allows quick and simple audits.
